INTRODUCTION

EXPLAINING THE TOKEN

The Blockchainius token offers investors the opportunity to be a part of the Blockchainius network. We offer a software solution for crypto and blockchain technology. In order for us to be able to offer the software for free in the future, financial resources are needed for the further development and maintenance of the software. Other tools and programs from Blockchainius will follow. A free trader based on the Binance Smart Chain and Ethereum protocol for Pancakeswap and Uniswap is currently being planned. The financing of this freeware is also to be made possible by means of the Blockchainius token.

THE PROBLEM

Many people didn't realize until it was too late that the crypto market was bigger than they thought, or that it even existed. For many, cryptos are simply unaffordable and unaffordable. Others have lost all their savings in so-called scam coins. We, the developers of the Blockchainius software solutions, also had to realize time and again that projects were not what was specified. The problem of tokens without the possibility to sell or remove liquidity has long been rampant and more and more investors are suffering significant losses.

We, the developers of Blockchainius, have decided for this reason to call our own token into the world. The token and the low fees shall ensure the further development of existing software solutions as well as the financing of new projects in the future. Blockchainius offers all software products in addition to a paid solution also as 100% freeware. This will remain the case in the future. At the same time, investors have the opportunity to invest in an existing and secure solution. The investors themselves receive by holding the coins of each transaction a certain share automatically transmitted to your wallet.

THE SOLUTION

SOFTWARE & TOKEN

Blockchainius is a young software provider in the crypto world. We have released Blockchainius software created for finding private keys with credits.

A BSC (Binance Smart Chain) and ETH (Ethereum) trading bot is planned for the future. The first trials are already underway. Via the BSC, Pancakeswap is used as the trading interface and Uniswap for ETH.

All Blockchainius software is and will remain freeware. In addition to the freeware, there is always a paid solution. The functionality of the freeware and paid version are identical. Only, the freeware has minimal fees that are automatically collected and automatically transferred when the software is successful.

New software ideas are always welcome and can be sent directly to us via the contact form. We work closely with the community.

TOKENOMICS

OUR TOKEN DISTRIBUTION

Tokenomics

● Supply	1.000.000.000
● Burn	15%
● Develoment	5%
● On Launch	80%
● -	-
● Fee Develoment	1%
● Fee Marketing	2%
● Fee to Holders	3%
● Fee Liquidity Pool	2%

GROWING STAGES

PHASE 01

- Software Development
- Release Software
- Token Design
- Social Media Channels
- Token Sales Start
- Listing on Free Voting Platforms
- 500 Members
- Planing new Software

PHASE 02

- Coinmarketcap Listing
- Coingecko Listing
- Create Partnerships
- Audit
- Coin competitions among all Hodlers
- 700+ Holders
- 2500 +Telegram members
- Release new Software

PHASE 03

- Listing on LBank or Hotbit
- Partnership with other Communitys
- Expand the Community
- 2500+ Holders
- 5200+ Telegram members

PHASE 04

- Massive Marketing
- Listing on CEX
- Marketing on financial platforms and guides
- Create Partnership with other reputable coins
- Development of the 2.0 coin -> implementation of rewards in other currencies.

THE MAIN TEAM

THOMAS B. | CEO

Thomas started programming in 2004. From small system tools to websites and web shops. In 2013 i started to be more interested in the topic of the crypto scene. What is it? What can it do? What can it be used for? This point has always fascinated me. There are endless possibilities with the blockchain!

BIANCA A. | MARKETING

Bianca is enthusiastic about technology, very communicative, finds a solution for everything and brings the right partners ashore. With their marketing skills, this coin can get really big. Bigger than many can imagine.

CHRISTIAN P. | DEV

Christian is an ambitious and gifted programmer. Omen and Sknife have closely observed the growing danger in the crypto market from Scamtokens and have come to the decision that they have to start a project together to counteract this.

ANDREA B. | DESIGN

Andrea is one of the best in its field. She designs everything around the programming. Creates graphics and much more. We are looking forward to the car wrapping! You too? :)

THANK YOU!
